

- regulation of lymphocyte activation
- adaptive immune response
- ATP synthesis coupled electron transport
- RNA splicing
- mitochondrial gene expression
- mitochondrial translation
- mRNA processing
- ribonucleoprotein complex biogenesis
- cytoplasmic translation
- endothelium development
- vasculogenesis
- muscle tissue development
- tissue migration
- cardiac muscle tissue growth
- heart growth
- protein localization to cytoskeleton
- protein localization to microtubule cytoskeleton
- cell–cell adhesion via plasma–membrane adhesion molecules
- homophilic cell adhesion via plasma membrane adhesion molecules
- aerobic respiration
- oxidative phosphorylation
- regulation of actin cytoskeleton organization
- regulation of actin filament–based process
- sensory perception of smell
- detection of chemical stimulus involved in sensory perception of smell
- respiratory electron transport chain
- electron transport chain
- regulation of inflammatory response
- branched–chain amino acid metabolic process
- lymphocyte mediated immunity
- leukocyte mediated immunity
- glucuronate metabolic process
- uronic acid metabolic process
